***Examiner's Amendment***

I. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

II. Authorization for this examiner's amendment was given in a telephone interview with Mr. Carl Brundidge (Reg. No. 29, 621) on April 29, 2005.

**III. The application has been amended as follows:**

All previous copies of claim 14 has been replaced with the following clean copy of claim 14 as amended by the Examiner's amendment:

14. A program embodied in a computer readable medium comprising:  
a workflow server program; and  
an application program,  
wherein said workflow server program comprises:  
a function of obtaining an operation status of said application program, said operation status being a work ready status, a work performing status and a work completed status,  
a function that upon reception of management information from an application program, said workflow server program updates, for each work ID, an application program stored in

Art Unit: 2194

association with said work ID and management information including an ID of subject to be processed by said application program associated with said work ID, information of said operation status, a work start time, and a work completed time, and

a function that when a working period calculated from said work start time and said work completed time exceeds a predetermined period, said workflow server program indicates a work ID, a subject ID and a processing time of said application program for judgment to determine whether a failure in said application program has occurred, and

wherein said application program comprises:

a function of transmitting management information to said workflow server program in response to said operation status, and

a function of transmitting a work ID and a subject ID of a work and a subject to be processed by said application program and information of said operation status to said workflow server program upon a timing of an occurrence of a plurality of events.
